PROJECTS

ATM Transaction. The project focuses on the development of a banking system in which an account can be created and credit/debit/money transfer operations shall be conducted. It also keeps up maintaining a close transaction history for the users. Other features include secure account management, user authentication, real time tracking of the balance.

Spotify UI Clone. I designed a clone of the Spotify web page along with a music player bar. HTML and CSS have been used, so it is responsive design-friendly and has great user experience.

My Portfolio. Below is a showcase of my portfolio, which I built in Next.js, articulating my skills, projects, and expertise in web development. It narrates the whole journey of me being a developer through dynamic illustrations of pages regarding my work, which falls under MERN stack, Java algorithms, and front-end design. It is fully responsive, optimized for performance, and integrated with GitHub for displaying live code and contributions. Go ahead and take a look through my journey, skills, and projects to learn more about my passion for innovatively building web solutions. ([Try it here](#))
